

# AYUSH PANGOANKAR

(+91) 8788925950 | Pune, Maharashtra | [ayushpangaonkar1@gmail.com](mailto:ayushpangaonkar1@gmail.com) | [LinkedIn](#)

## OBJECTIVE

Motivated Python Backend Developer with internship experience in Django, REST API development, and MySQL database integration. Experienced in working on production-level applications, backend logic implementation, and API handling. Seeking an opportunity to contribute technical skills and grow in software development and backend engineering

## EDUCATION

**Walchand Institute of Technology, Solapur** Nov 2022 – June 2026  
Bachelor of Technology – Electronics and Telecommunication Engineering | CGPA: 8.36

## SKILL SUMMARY

**Technical Skills:** Python, HTML, CSS, JavaScript, React.js, Django, SQL, DRF.  
**Databases:** MySQL, PostgreSQL, SQLite.  
**Tools:** PyCharm, Power Bi, Tableau, Git, GitHub and Visual Studio Code.  
**Core Concepts:** DBMS, Backend Technologies, Authentication & Authorization (JWT).

## EXPERIENCE

**Software Engineer Trainee | The Data Tech Labs | Pune** Jan 2026 - Present

- Designed and managed scalable backend APIs using Django REST Framework.
- Integrated MySQL database with Django applications for efficient data handling.
- Worked on live production-level projects involving API integration and backend logic.
- Tested APIs using tools like Postman.
- Collaborated with team members on debugging and deployment tasks.

**Internship | Artificial Intelligence and Generative Ai | Ybi Foundation** Mar 2026 – May 2026

- Learned fundamentals of Artificial Intelligence and Generative AI.
- Gained understanding of Machine Learning, Deep Learning, and Large Language Models (LLMs).
- Explored AI tools and applications used for automation and content generation.
- Practiced prompt engineering techniques and AI-assisted problem solving.

## PROJECTS

**Smart Resume Screening**

- Built a full-stack web application using React.js and Python Backend (Django) to analyze and parse resumes.
- Integrated LinkedIn API to recommend live job opportunities based on extracted skills.
- Implemented NLP techniques for keyword matching and candidate-job fit scoring.
- Used PostgreSQL for backend data storage, enabling fast retrieval and processing of resume information.

**Ai Mock Interview Bot**

- Developed an interactive AI Mock Interview Bot using Python (Tkinter) for a dynamic GUI interface.
- Integrated OpenCV for real-time camera input and Pillow for image rendering.
- Utilized Matplotlib for visual performance analytics and NLP libraries for intelligent answer evaluation.
- Implemented multithreading to ensure smooth, real-time processing during interview sessions.

## CERTIFICATIONS

- IBM Generative Ai in Software Development
- Advance Project Management
- AWS Cloud Foundation
- Coursera Machine Learning

## ACHIEVEMENTS

- Participated in multiple coding competitions.
- Proven ability to learn quickly and adapt to new tools and technologies.
